COURTROOM CONUNDRUM

On the 11th and 12th of April 2025, The Compendium, in collaboration with Citadel and under the guidance of the Dean, Student Council & Clubs (SC&C), organized an innovative and immersive experience titled "Courtroom Conundrum" at the TIIC Centre, IARE. The event, open to students from the second, fourth, and sixth semesters of the B.Tech program, was conducted over two days and saw active participation from more than 50 attendees.

The first day began with an introduction to the structure of the event, followed by the unveiling of a fictional legal case. Participants were grouped, given roles, and were also given time to prepare their arguments, setting the stage for the courtroom simulation. It was a day of planning, interesting decisions, as well as conversations among participants! The first day set up for the real action of Day 2!

The second day brought the setup to life, as teams stepped into the roles of prosecution, defense, and jury, engaging in passionate arguments, cross-examinations, and deliberations. It was like a courtroom scene from a movie unfolding right before your eyes. Then, after assessing the enthusiasm, eloquence and sharpness of each participant, the brilliant winners were decided - K. Prachita and Amgoth Ajay Nayak.

The proceedings concluded with a final verdict, delivered under the observation of judges Mr. M. Sai Charan and Ms. M. Yasasvi, who ensured a realistic and professional atmosphere throughout. "Courtroom Conundrum" was praised for its original concept and ability to foster essential soft skills such as analytical reasoning, confident speaking, and collaborative thinking
